

InfoSec Celebrates 10 Years of Partnership with CA

Centreville, VA, March 10, 2009 – [InfoSec, Inc.](http://www.infosecinc.com) today announced that it has reached a 10-year milestone in the partnership relationship with CA, Inc. (formerly Computer Associates.) To document this milestone and the success of the partnership, CA has published a [Partner Profile of InfoSec, Inc.](#)

InfoSec was formed in 1998 as a mainframe security consulting firm. It provides high-quality mainframe software and services that help organizations increase operational efficiency, improve compliance and reduce costs. As a premier service provider and reseller of CA mainframe software and services, the Partner Profile describes how the relationship began, why it is successful and where it is going.

“The partnership with CA over the past 10 years has been tremendous. We have grown from being just a service provider to also reselling CA’s world-class mainframe technology and even acting as pre-sales experts”, said Robert Fake, President of InfoSec. “We greatly value our relationship with CA and support that relationship by providing experts in CA technologies, developing software to support CA technologies and selling CA mainframe software. An example of this is our [TSSadmin Express™](#) product, which directly supports clients of CA’s Top Secret mainframe security software.”

Over the 10 year partnership with CA, InfoSec has provided senior consultants on nearly [100 services engagements](#) for CA. The type of projects completed have included CA Top Secret and CA ACF2 implementations, mainframe security assessments, DoD audit remediation, RBAC implementations, security administration, security conversions and more. Projects have ranged from several days to several years.

“We are seeing a trend back to the mainframe: says Fake. “This trend requires the expertise that InfoSec has specialized in for over 10 years and creates more opportunity for CA’s world-class mainframe technologies.”
