

## **INFOSEC EXTENDS MAINFRAME SERVICES WITH CA AT MAJOR HEALTHCARE PROVIDER**

Centreville, VA, July 2, 2007 – InfoSec, Inc. today announced that along with CA, the mainframe security staff providing CA-Top Secret security services to Health Care Services Corporation (HCSC) has been extended through December 31, 2007.

InfoSec, partnering with CA, has been providing services ranging from cleanup of the mainframe CA-Top Secret security database, to role-based access control and general security support since 2002. These continuing services are to assist the client meet their mainframe auditing and compliance challenges.

“InfoSec’s expertise in mainframe technologies, particularly mainframe security, along with CA’s world-class technology, position us well to support our clients and assist them in meeting their mainframe compliance challenges,” said Robert Fake, President of InfoSec. “The fact that we have been working with CA and HCSC since 2002 is a testament to the high quality of personnel and services we can provide not only to HCSC, but all mainframe clients.”

“The collaboration between InfoSec and CA has been critical to completing contracts, maintaining client satisfaction, and keeping the client’s project on track” stated John Read, Delivery Manager for CA.

The mainframe is not going away any time soon,” said Fake, “and our clients need the skills to maintain their mainframe operations. That’s where we fit in.”

InfoSec services are available for all mainframe areas including Security, Performance Management, Workload Management, Output Management and more. Depending on client needs, services can be tailored to meet client requirements.
