

See MEAS™ in Action at SHARE 2011. Don't Miss It!

InfoSec, Inc., along with our partner DG Technology Consulting, is proud to announce that we will be showcasing our brand new, breakthrough technology at SHARE 2011 in Orlando this year.

Our new Mainframe Event Acquisition System™ (MEAS™) is a game-changer for mainframe users that provides advanced capabilities for collecting real-time security, database, on-line transaction, console events and more.

You won't want to miss a demonstration in Booth #502 on how the new MEAS™ software can help leverage your mainframe investment while protecting against security breaches in real-time.

Stop by Booth #502 for your exciting preview! If you can't make it to the show, but would like a personal demo of this groundbreaking software, [contact InfoSec today](#).
